

Warning Signs

When there's a warning do we ever prepare?
To take heed what is said and take vigilant care
It may tell us of hazards which we'd want to evade
So study it careful and read what's displayed

Warnings advise, of an impending event
Of possible perils, so we can prevent
A warning to keep us from danger or harm
Which expose us to risk causing grief or alarm

So follow the advice given, then you can be sure
To take note of the warning to be safe and secure
Don't be distracted from reading the signs
For you'll end up in strife, paying exuberant fines

People ignore warnings they go their own way
Like the Israelites of old, left to wander and stray
A dire experience through neglecting God's Word
Turning their backs on all that they'd heard

They rejected God's Law time after time
By living a life of misdeeds and crime
They worshipped false gods disobeyed His commands
Adapting and changing on what He demands

God gave us commandments for all to obey
Giving us laws to follow each day
So have your eyes focused, let them never grow dim
To walk in obedience and be guided by Him

If you keep to his rules, God saves you from danger
So come to know God and don't be a stranger
Accept his salvation and pardon of sin
Don't leave it to chance, where you think you will win

There's a final warning for the wicked and just
For only in him can you faithfully trust
God's judgements are good, righteous and true
So never reject his invitation to you
